DEVELLAR'S PROJECT BASED BUSINESS MODELS

Fixed bid projects

Based on Client's requirements, Devellar is able to provide Fixed Bid Projects Business Model. It means that Devellar's developers will be able to estimate your Technical Specification and propose fixed price and fixed delivery date for the development of your product. The developers engaged for such type of projects are drawn from Devellar's Product Development Department. Thus Devellar take full responsibility for the project time frames and deliverables. If you don't have clear Technical Specification then we are capable with the help of our analytics to create detailed specification for you. After delivery of the Project, you will be proposed a fully managed service with Support & Maintenance as a further option. Developers that have been attracted for the project from Devellar's Product Development Department can become your Dedicated Team.

IF YOU:

1. Have a detailed description of a product\application needed to be develop or ready to make it with our analytics.

2. Have irregular, although ongoing, one-off project.

3. Won't be changing requirements during software development life cycle and can prove that in a contract.

4. Want to have a pilot project before committing to Devellar's Dedicated Team model than Fixed Bid Projects BM is a perfect suit for you.

SOLUTIONS PROPOSED BY DEVELLAR:

1. Custom Web Solutions and applications.

2. E-commerce and Content Management systems.

3. Games. Development of social, casual games and gambling applications

4. QA & Support

HIGH QUALITY IS A STANDARD

ADVANTAGES OF FIXED BID PROJECTS BM FOR OUR CLIENTS:

1. Fixed budget.

2. Ability to plan product publishing.

3 No extra payments.

DISADVANTAGES OF FIXED BID PROJECTS BM FOR OUR CLIENTS:

No opportunity for change requests and unavailability to re-prioritize the tasks during the development stage.

FIXED BID PROJECT LIFE CYCLE

Idea. SRS → Estimation &Proposal → Workshop (Project Backlog)

↓

Satisfied CLIENT :) ← Product ← Development
